Subject Re: Gulfco Discussion Confirmation

Eric,

Both of the understandings described below are correct; that is, the 2 ft by 2 ft well pads are approved; and PBW will analyze the ground water samples for those analytes described in the PBW letter dated January 19, 2007, as modified by EPA's March 1, 2007, approval letter.

Subject Gulfco Discussion Confirmation

Hi Gary -

Just to confirm our discussions at the Site last week, it is my understanding that you verbally approved my request for construction of 2 foot by 2 foot concrete pads at the Phase 2 monitoring wells in place of the 4 foot by 4 foot pads described in the Field Sampling Plan. Also, as we discussed, a temporary 12-in diameter pad was constructed at those wells located in areas with standing water. 2 ft by 2 ft pads will be constructed at these wells at such time as conditions allow (hopefully within the next couple of months).

Also to confirm our telephone conversation this morning - EPA's oversight contractor will be collecting split groundwater samples from certain wells with analyses for the full suite of analytes listed in the RI/FS workplan; however, PBW will analyze these samples for only those analytes described in our January 19, 2007 letter as modified by your March 1, 2007 approval letter.

Please let me know if you have any questions or if I misunderstood our conversations.

Thanks.
